Limits to growth: is it possible to achieve sustainability ?

---

Source: Limits to growth - The 30 year update

# ENVT3065 Sustainability challenges

## Motivations

---

IPPC reports are more and more alarming -> **environmental** challenge.

Fossil energies are not unlimited -> **energy** challenge.

Raw materials are not unlimited -> **raw material** challenge.

There is an urgent need to act to **meet the sustainability challenges**.

**Education** is a powerful way to achieve this goal. We need engineers:

- aware of the complex challenges and capable of understand, analyse and propose practical solutions
- capable of systemic approach that combine several fields: climatology, energy, ICT, circular economy, etc

# ENVT3065 Sustainability challenges

## Schedule

---

<https://github.com/jonathandumas/ENVT3065-sustainability-and-challenges>

### Lesson 1:

- kick-off presentation [30 min]
- ice breaker: each student present himself and ask to others what is sustainability for him, why he/she is there etc) [30 min]
- presentation: sustainability challenges [1h30]
- Q&A | debate on the presentation [1h00]

### Lesson 2:

- activity: climate collage (by groups of 8) [3 h]
- activity: in small groups (4-5) imagine new cards [1 h]

### Lesson 3:

- presentation: climate change (X. Fettweis) [2 h]
- activity: debate | Q&A [1 h]

# ENVT3065 Sustainability challenges

## Schedule

---

### Lesson 4:

- activity: in small groups (4-5) try to depict the interactions between energy, climate & economy [30 min]
- presentation: interactions between energy, climate & economy [1h30]
- activity: discussion on the video « Modéliser l'avenir de l'humanité - Heureka » <https://youtu.be/nAO21ec1lqc> [1 h]

### Lesson 5:

- presentation: fossil energy, issues for the society and industry [1h00]
- activity: analyze of the TSP report <https://theshiftproject.org/article/ue-declin-approvisionnements-petrole-2030-etude/> [2h00]
- activity: presentation in small groups of the report [1h00]

### Lesson 6:

- Numerical collage [3 h]
- activity: in small groups (4-5) imagine new cards [1 h]

# ENVT3065 Sustainability challenges

## Schedule

---

### Lesson 7:

- presentation: sustainable ICT [1h00]
- activity: analyze of the report “CLIMATE CRISIS: THE UNSUSTAINABLE USE OF ONLINE VIDEO” <https://theshiftproject.org/en/article/unstable-use-online-video/> [2h00]
- activity: presentation in small groups of the report [1h00]

### Lesson 8:

- presentation : carbon footprint or discussion on the video <https://youtu.be/mj9Fma0dRoE> « Le capitalisme peut-il faire face aux défis environnementaux ? - Heu?reka « [1h00]
- activity: myC02 ? [2h00]
- presentation : EROI [1h00]

# ENVT3065 Sustainability challenges

## Schedule

---

### Lesson 9:

- presentation : You me & climate [1h00]
- activity: debate on the conference [1h00]
- activity: analyze in small groups the FABI Belgium Energy Outlook 2050  
<https://www.fabi.be/transition-energetique> [2h00]

### Lesson 10:

- activity mobility collage [3h00]
- activity: in small groups (4-5) imagine new cards [1 h]

### Lesson 11:

- presentation : ? (B. Cornélusse)
- activity : ?

### Lesson 12:

- activity : build in small groups (2-3) the collage of this lesson [3h00]
- activity : peer grading of the collages [1h00]

Us

---

Jonathan Dumas  
PhD candidate & Teaching  
assistant  
*Active member of the Shifters  
Belgium*  
*Active member of the ReD within the  
sustainability group*

Bertrand Cornélusse  
Associate professor

Xavier Fettweis  
Permanent FNRS researcher

# **ENVT3065 Sustainability challenges**

## **Evaluation**

---

Build your own collage of this lesson and present it (groupe of 2-3) [50 %]

Participations to collages (climate, numeric, and mobility) [25 %]

Participations to activities of the lessons [25 %]
